Portfolio of Recent Work

The Echoes Project helped senior citizens cope with feelings of loneliness through the supportive creation of photo albums, communication with family & friends, and the playing of online games. The system consisted of the TeleTable (pictured above) and Pitara, which work together to aid the seniors. The project was accepted to the SIG CHI Student Design Competition in Portland Oregon (April 2-7, 2005). For more information, see http://design.informatics.indiana.edu/echoes

November 2004 - April 2005

Write notes to your future self!

To use jMinder, simply write your message in this box, enter an email address, then pick a date for the message to be sent. Your email will be sent automatically on that date. :-) (Don't forget to erase these instructions first)

Email: [ ]

and/or

Mobile Phone Number: [ ] @ [Service Provider ▲▼]

Date: [Month ▲▼] [Day ▲▼] [Year ▲▼]

[**jMind me!**]

jMinder is a web tool that can be used to send an email and/or text message on a future date. The design was influenced by two observations. First, people are apt to forget minor details that are not worthy of entry in a calendar. Also, people enjoy reading letters sent from an earlier date in history, as is done in many elementary school classes. jMinder is a simple tool written in PHP. Try it at http://josh.ev9.org/jminder.php

Project technophile was a four month study of people who love technology. The project aimed to discover design concepts and strategies that would garner interests related to humanitarian aid. User studies, ethnographic experiences, interviews, and other methods led to many design concepts. Work done here earned a "Design Exchange Excellence Award." For further information on the Design Exchange, see http://design.informatics.indiana.edu/wiki/

January - May 2005

project technophile

My current major project is a study of how people prepare for, carry out, and experience multimedia presentations. It is my hypothesis that many audiences are bored by presentations carried out in PowerPoint and related software packages. I am in the process of designing a concept system that will make it easier to convey information in engaging ways. The picture above depicts a sketch of my design process. For more information, see http://josh.ev9.org/capstone
